## The Matix Rail at Northstar-at-Tahoe

Written by  
Larry Nuñez

Take a look at any issue of the mag this year and you'll see that collaborations are everywhere right now. Between snowboard brand to snowboard brand, skate shoe to artist or car company to music label—basically everyone is joining forces to come up with unique and memorable products. Matix, Northstar-at-Tahoe and Snow Park Technologies have taken it one step further with a park partnership that highlights today's progressive rail building capabilities with one of the most stylish clothing companies around.

The result of the collabo with Matix is a permanent 25-staircase located in Northstar's Moonshine park. With a 10' flat to 25' down flatbar rail, a 25' single barrel rail and a 10' flat to 25' down box with ledges, the giant staircase is a challenging feature for advanced riders. Designed by Ricky Melnik of DVS and Gunny of SPT, the Matix handrail proves what is possible when people work together for a common cause. Along with other brands like DC, Nike 6.0 and Dragon, Northstar has shown what a little teamwork can bring. 🌱
